### 56229 USCAR REPLACEMENT VEHICLE END WITH 24" WIRES

## **TOOLS NEEDED**

Wire stripper Crimping tool Heat gun

## WARNING

Avoid heating the gas tank, fuel lines, brake lines or other flammable materials when heating the heat shrink.

# INSTALLATION

#### Step 1

Strip the insulation to reveal 0.25" of bare wire (A).

### Step 2

Place the heat shrink on the wire as shown below (B). Crimp the butt splice.

### Step 3

Position the heat shrink over the splice (C) and heat using a heat gun or similar device.
